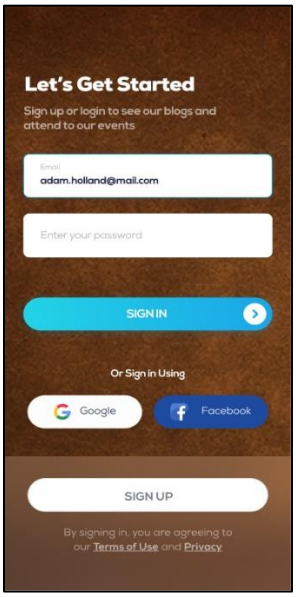
I. Login screen

Old Screens	New Screens

Login screen

This screen will make use of Facebook/Email/Google Accounts to sign up/login to their page.



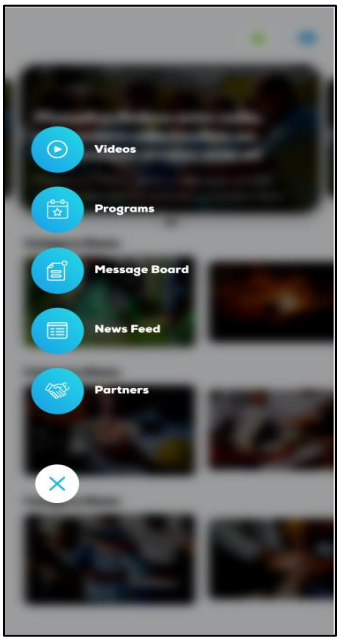
II. Home screen

Old Screens	New Screens

Home screen

This is the screen users will see after the login.

Following screens will further display more navigation options



Home screen

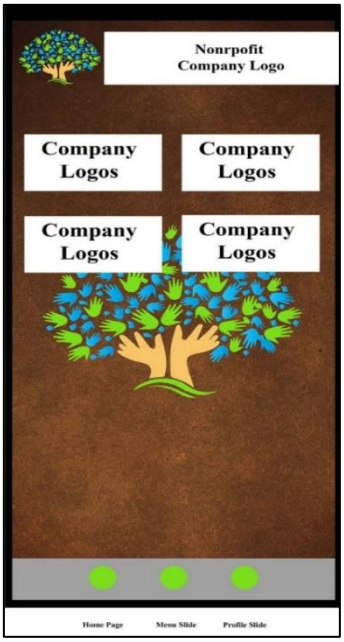
Under new design/layout, traditional home screens have been replaced with a more modern flow with menu items listed as a taskbar (listed below).

III. Left menu screen

Old Screens		New Screens
	Left menu screen This screen lists all the sub-pages to be used by end users to navigate to the partners page, access message boards, video pages hosted in Google Cloud and the programs offered by the tenants.	
IV. Right menu screen

Old Screens		New Screens
	Right menu screen This will be the screen for users to update their Profile pictures/display pictures and other personal information	
V. Partners Page

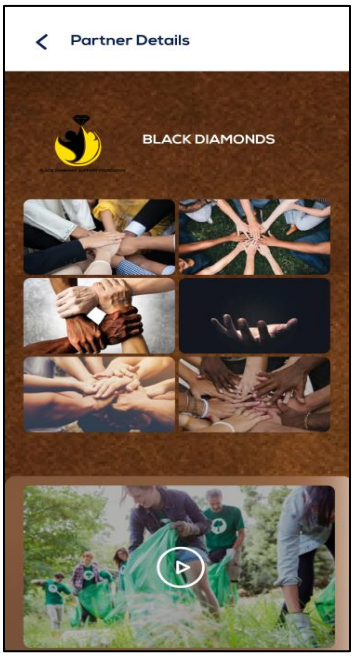
Old Screens

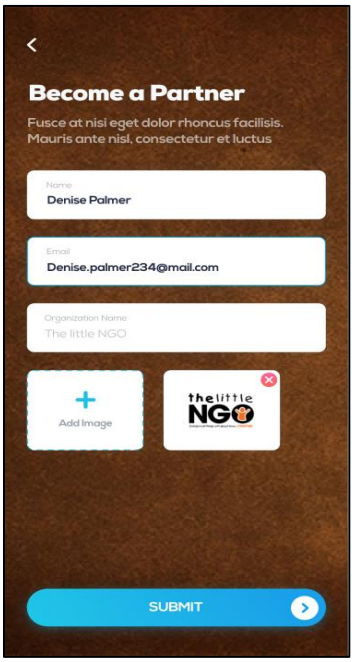


Partners Page

This will be the screen for users to get more details about the partners/tenants. This includes a profile image, video greetings and contact information.
Corresponding page shows other partners in the network and can be redirected to retrieve more information on the tenants.

New Screens





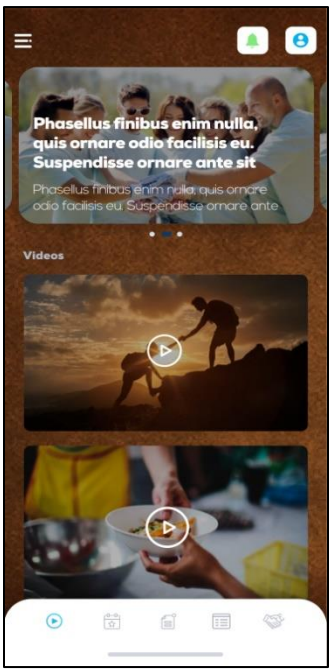
VI. Video page/Programs page/Message board page

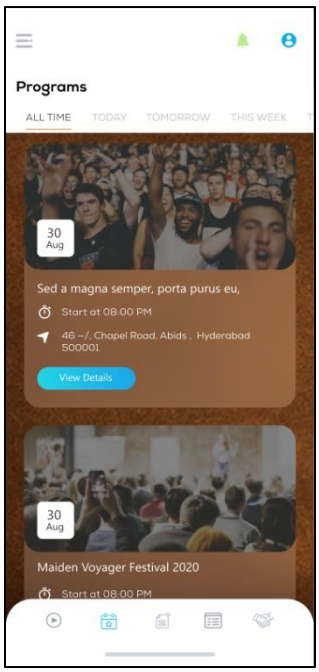
Old Screens

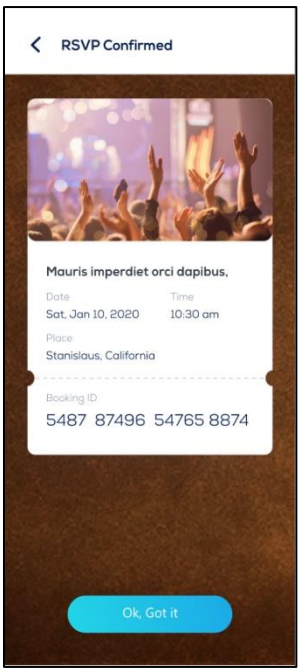
Video page/Programs page/Message board page

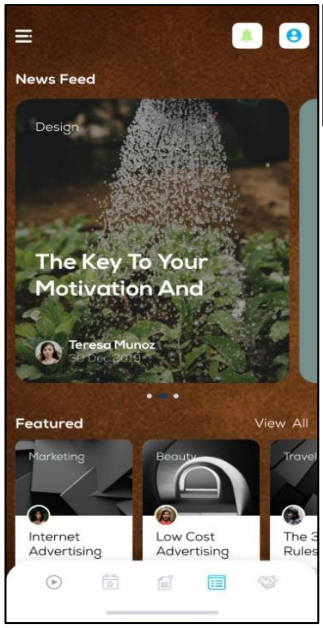
Video page is for daily/weekly news letters by the tenants, along with the content listing host in the cloud. Upon clicking the content icon, it pops up a small window to display the content.
Programs page is desired to offer various listing to the activites offered by the tenants, it could be a video or pdf type content.
Message board page is meant to provide its users with a platform/forum to receive communications from the tenants.

New Screens









Video page/Programs page/Message board page

Message board page is meant to provide its users with a platform/forum to receive communications from the tenants. They can always go back to old messages/News feeds.
News feeds will come with an attached pdf option for end users to download.
Notification icon will be integrated with system push services for end users to stay updated.
